

Cut these shapes out of felt or thick fabric to cover your electronics.

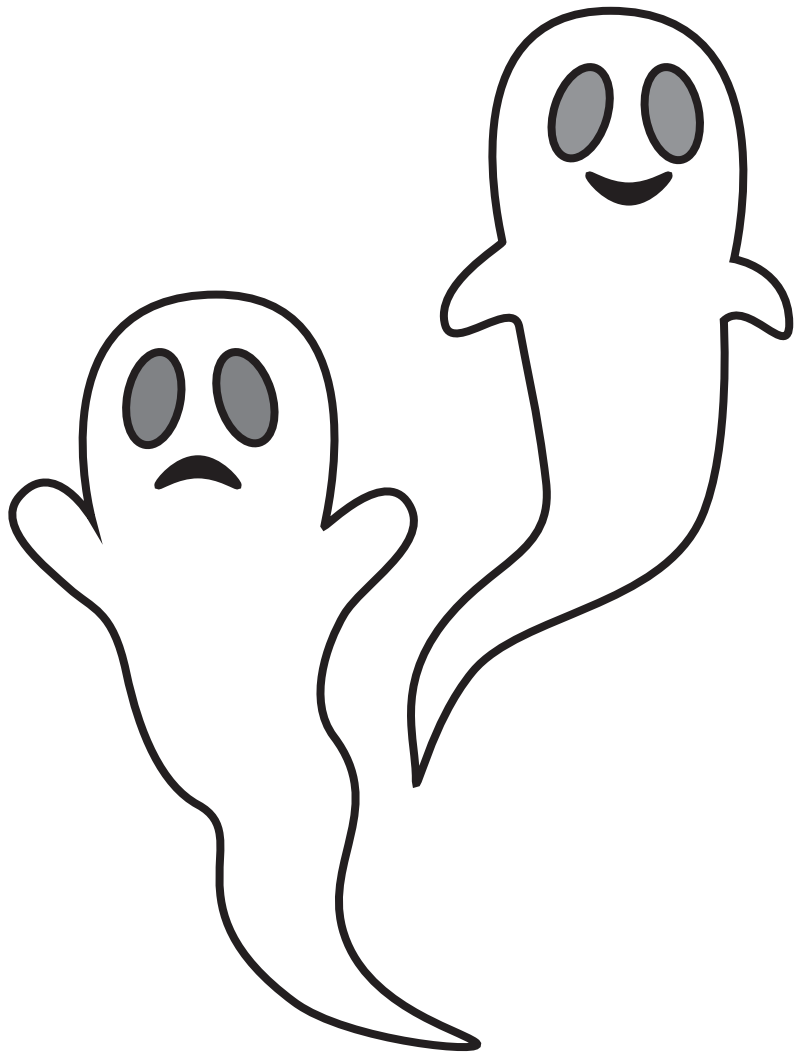

Gravestone:

This piece will cover the battery holder and LilyTwinkle. Use velcro to attach to your finished project so you can access the battery holder.

Ghosts:

These pieces will cover two LEDs under the eyes. Don't forget to cut out the eyes so the lights shine through! Use a hobby knife for small edges and details. Use thin yellow or red fabric behind the eyes for a fun look.

Print this page on cardstock to use as templates. You can also print on photo fabric and color in/cut out the shapes.
