

*Cut these shapes out of felt or thick fabric to cover your electronics.*

**Ground:**

*This piece will cover the battery holder and LilyTwinkle. Use velcro to attach to your finished project so you can access the battery holder.*

**Haunted House:**

*This piece will cover all the LEDs with windows. Don't forget to cut out the windows so the lights shine through! Use a hobby knife for small edges and details. Use thin yellow or white fabric behind the windows for a fun look.*

*Print this page on cardstock to use as templates. You can also print on photo fabric and color in/cut out the shapes.*
