SparkFun Electronics Summer Semester

Table of Contents

1. Class Overview
2. Day One:
 - a. Prototyping Tips and Tricks, Material by Kade Jensen, Todd Treece, Pete Lewis, Abe Lee, Nathan Seidle and Linz Craig
 - b. Napkin Schematics, Material by Ryan Owens and Linz Craig
 - c. List of Parts Procurement Sources, Material by Ryan Owens
 - d. Intro to Arduino Materials, Material by Linz Craig
 - i. Slides for Note Taking
 - ii. Installing Arduino
 - iii. Arduino Cheat Sheets and Diagram
 - iv. Analog and Digital
 - v. Input and Output
 - vi. SIK Circuits
 - vii. Powering Your Project
 - viii. Transistors
 - ix. Voltage Dividers
 - x. Pulse Width Modulation
 - xi. Basic Programming Operators and Comments
 - xii. Serial basics
3. Day Two:
 - a. LilyPad Basics, Material by Casey Haskell and Linz Craig
 - b. Soldering PTH, Material by Pete Lewis and Linz Craig
 - c. Soldering SMD, Material by Pete Lewis
 - d. Soldering Stenciling, Material by Bob Hunke and Linz Craig
 - e. Etch-A-Simon Handouts, Material by Ben Leduc-Mills
4. Day Three:
 - a. Eagle Handouts (With Eagle Manuals) Material Courtesy of Eagle
 - b. Programming Handouts, Material by Rob Carpenter and Linz Craig
5. Day Four:
 - a. Wireless Overview, Material by Ryan Owens
 - b. Xbee Handouts
 - i. Communication & Firmware, Material by Rob Faludi, Michelle Shorter & Ben Leduc-Mills
 - ii. AT commands, Material by Rob Faludi and Linz Craig
 - iii. New SoftSerial, Material by Mike Grusin
 - iv. Xbee Common Mistakes, Material by Rob Faludi
 - c. GPS Overview & Activity, Material by Aaron Weiss
6. Glossary
