VDD 2.4 to 3.6 V
VDDIO 1.71 to VDD

Set VDD and VDDIO equal by default

AD0/SDO defaults to 0V. This sets the I2C address to 0b1101000 (0x68) and leaves the AD0/SDO PTH disconnected. Connect to AD0/SDO PTH to change externally. Pull high to set address to 0b1101001 (0x69).
